May/June is mating season with lots of interesting interaction. Mid July is the season of cubs scrambling along behind their mom as they first explore their wilderness home. Mom is very protective of her cubs as she teaches them bear survival. Approx. July 20 to August 24 the salmon are running up the river mouth. The bears are chasing the fish around in the low tide pools. In the fall you can watch the bears eat salmon carcasses and rice root in the estuary at low tide.
